

---

**WHAT WE DO:**

---

**Program/Project Management**

**Planning**

**Environmental Compliance**

**Resource Management**

**Permitting**

**Public Involvement**

**Wildlife Surveys**

**Contract Staffing**

---

**WE ARE:**

**a client focused company**

- that maintains long-term relationships with our clients.
- with knowledge of our client's community, staff and active stakeholders.
- that implements project-specific solutions based on policy direction from our clients.

**program managers**

- that manage staff and other resources with labor-weighted schedules.
- that develop and maintain project budgets based upon needs and not maximizing profits.
- that work to keep project team and client staff equally informed.
- that understand quality comes first.

**communicators**

- that identify and resolve issues.
- that reach out and educate the public and other stakeholders.
- that mediate stakeholder conflicts.
- that manage multi-agency processes.
- that achieve consent on analytical methods early in the process.

**analysts**

- that use quantified and objective data and transparent methodology for analysis.
- that develop effective and reasonable implementation strategies.
- that develop mitigation monitoring programs that measure success and identify remedies in the event of problems.

**WE WILL HELP YOU:**

- augment your staff to efficiently complete projects.
- achieve consent between your staff, public agencies, stakeholders and other advocacy groups so that decisions may be made to move forward on projects.
- ensure legal and procedural adequacy of environmental documentation by informing you of potential issues and resolutions in a timely manner.
- conduct public outreach and educational programs to engage and encourage stakeholders early in the process.
- bring outside experts together to solve unique, complex or controversial problems.

---

**HBA IS UNIQUE  
BECAUSE WE:**

---

- **complete complex and controversial projects where others have failed.**
  - **achieve consent between opposing views.**
  - **use objective and quantified criteria with points of significance, to evaluate issues.**
  - **integrate the requirements of NEPA, CEQA, the Tahoe Regional Planning Agency, cities, and counties.**
  - **maintain long-term client relationships.**
  - **use experts to establish fact and our team-building skills to develop solutions.**
  - **coordinate multiple agencies and team members.**
-

## MEET THE ASSOCIATES

**Anders Hauge** - A planner that manages environmental, land use planning, mitigation, and public outreach programs. Mr. Hauge's career has focused on large scale, complex and controversial projects in the western United States, Venezuela, and the Dominican Republic. Mr. Hauge effectively uses quantifiable and objective performance criteria in his practice. Unique to the regulations within the Lake Tahoe Basin, Mr. Hauge prepares a single document that meets the combined requirements of CEQA, NEPA, and the TRPA.

**Rob Brueck** - A planner that specializes in the management and preparation of environmental and planning documents for public and private clients in the western United States. Mr. Brueck's environmental experience includes documents prepared for the California Environmental Quality Act (CEQA), National Environmental Policy Act (NEPA), Tahoe Regional Planning Agency (TRPA), and state and federal permitting.

**Brian Farris** - A planner that has completed environmental and planning projects in the western United States, China, Thailand, and Saudi Arabia. His experience includes working with local, regional, state and federal governmental agencies, the World Bank, and the private sector, including major oil refineries, manufacturers, and Saudi Aramco. Mr. Farris has experience in preparing plans for environmental impact, public participation, and air quality programs.

**John Heiser** - A planner responsible for City and County Planning. Mr. Heiser has provided project and program management on Renewable Energy Projects, Pedestrian and Bicycle Plans, Housing Element updates, Housing Condition Surveys, 5-Year Redevelopment Implementation Plans, managed and implemented redevelopment related projects located at former Fort Ord Military Base and airport, Monterey, California and both NEPA and CEQA documentation. He has preformed land use entitlement work for public agencies including Downtown Specific Plans and design guidelines.

**Garth Alling** - A biologist specializing in terrestrial wildlife biology, and environmental permitting in the Lake Tahoe Basin and Sierra Nevada. Mr. Alling has gained experience as a field biologist in the states of Washington, Oregon, California and Nevada. Mr. Alling performs biological analysis for Public Agencies such as USDA Forest Service, California Tahoe Conservancy, and the Tahoe Regional Planning Agency in accordance with NEPA, CEQA, and the rules and regulations of the Tahoe Regional Planning Agency.

---

DID YOU KNOW:

---

Associates at HBA have managed 28 state, federal and regional agencies on one project.

Hauge Brueck Associates, LLC was formed in July 2006 to serve long term clients of the company's Managers and Associates.

---

Sutter Creek

**Melanie Greene** - A scientist responsible for mitigation and monitoring, planning and preparation of CEQA and NEPA environmental documents. Ms. Greene is experienced in the issues of the Lake Tahoe Basin and government agencies (Forest Service, EPA, National Park Service, Peace Corps, AmeriCorps). Ms. Greene has worked within the CERCLA process for remediation of a closed public landfill and within the BAER process for emergency rehabilitation of lands impacted by wildland forest fires. Ms. Greene is a Certified Professional in Erosion and Sediment Control (CPESC) and State of California Qualified SWPP Developer and Practitioner.

**Blake Roberts, Ph.D.** - A planner responsible for managing and preparing environmental and planning documents. Dr. Roberts has been involved in community and regional planning as an educator, researcher, writer, and practicing planner. His professional and academic experience has focused on downtown and neighborhood revitalization, urban design, form-based codes, environmental review, collaborative planning, and plan implementation.

**Christy Consolini** - A planner responsible for environmental planning specializing in CEQA/NEPA documentation, permits, public outreach, multidisciplinary problem solving, and multi-agency consensus. Ms. Consolini is experienced in managing and preparing Environmental Impact Reports, Environmental Impact Statements, addenda, Initial Studies, Environmental Assessments/Negative Declarations, Construction Specifications, permits, Housing Elements, and Consolidated Plans. Ms. Consolini has experience with the Lake Tahoe Basin and TRPA, including EIR/EIS projects.

**Katie Patton** - A business professional responsible for supporting project management and the preparation of environmental and planning documents. Ms. Patton develops and manages administrative records and project records for environmental documents; as well as coordinates public meetings, assists with document research, accounting, and website maintenance.

**Heidi Johnstone** - A business professional responsible for supporting management in the preparation of environmental and planning documents as well as invoicing and accounting. Ms. Johnstone has experience in website design and management. She created a website specifically designed to keep the public updated on the City of Sutter Creek Gold Rush Ranch project. Ms. Johnstone has created signage, brochures, banners, posters and postcards for public open houses on various projects.

**Katrina Lynch** - A business professional responsible for supporting management in the preparation of environmental and planning documents as well as invoicing and accounting. Ms. Lynch has experience as an Executive Sales Assistant supporting the marketing efforts of the sales team.
